

TT-1001

Overfladerens

Technical Info

- Storage: Tightly sealed in original container.
- Frost-free.

Packing

TT-1001 Overfladerens - can 20L

TT1001

Product

Characteristics

TT-1001 dissolves and removes all unwanted growths and deposits on stone and wood surfaces.

TT-1001 is particularly effective against all growths and deposits on all types of surfaces: new and old tiles/paving, stone, painted or whitewashed façade walls, wicker fences and garden furniture and much more.

Use

- Ready for use.
- Apply with a spray nozzle.

For best results and effect, leave TT-1001 to soak in for at least a day before it is allowed to get wet. Already after the first day the green deposits will have turned grey, and they are ready to be hosed off with clean water. For even better results, respray the surfaces with TT-1001 after a few days. This will give a good long-term effect.
