

TT-111 Hvid Calcium Multifedt

WATERPROOF AND HEAT RESISTANT GREASE

- ✓ Penetrating white grease that prevents corrosion and reduces wear.
- ✓ Stable at temperatures from -35°C to + 185°C.
- ✓ Contains no acids and is safe to use on plastic and rubber.
- ✓ Unique 360° jet spray, to be applied at any angle.

Technical Info

- Appearance: white grease in aerosol.
- Base: calcium.
- Specific weight at 20°C: 1.120 g/cm³ DIN51757.
- Flow temperature: 185°C.
- Solidification temperature: -35°C.
- 4 Ball test DIN 51350: 300-320 kg.
- Water resistance DIN 51807 at +90°C: total.
- Shelf life: 24 months, keep dry, cool and frost-proof.
- Safety measures: consult the Safety Data Sheet.

Packing

TT-111 Hvid Calcium Multifedt - aerosol 400ml 231111118

Product

Characteristics

Hvid Calcium Multifedt is a multi-purpose heavy-duty lubricant, based on calcium. It is easy to use, the spray can deliver an even coverage, prevents waste and contamination. Hvid Calcium Multifedt has a high penetrating capacity. The product flows out as a thin oil which then becomes a grease. The premium quality gives a superior film strength and very high water and temperature resistance.

Applications

- Locks, window guides, lock mechanisms, hinges, wheel bearings, water pumps, machine parts and chains.
- Motorcycles and bicycles: clutches, gas controls, brake parts, gears, brake combs, chains, cables, ...
- Applications subject to heat, water, vapor such as fans, bearings, transmissions, conveyor belts, ...

Use

- Shake before use.
- Apply on clean and dry surface. Clean and degrease if necessary with TT-1014 Sikker Afrens FS and / or TT-1004 Multif foam.
