

TT-114 Skæreolie

LUBRICANT FOR METALWORKING

- ✓ Lubricating and cooling action.
- ✓ Prevents tools from seizing, increasing their life.
- ✓ Prevents drill shattering.
- ✓ Jet spray nozzle to reach difficult areas.

Technical Info

- Appearance: aerosol.
- Base: mineral oils and additives.
- Colour: clear, light yellow.
- Flashpoint of active agent: 180°C.
- Density: 0.8 +/- 0.1 kg/dm.
- Flammability: very easily flammable.
- Shelf life: 36 months, keep dry, cool and frost-proof.
- Safety measures: consult the Safety Data Sheet.

Packing

TT-114 Skæreolie - aerosol 400ml

231001118

Product

Characteristics

Skæreolie is a lubricant for every form of metalworking such as tapping, thread cutting, drilling, sawing, milling, ... The controlled lubrication and the practically immediate cooling increase the service life of tools and improve the machining result. Skæreolie is universal, both for machining the hardest stainless steel such as stainless steel and for softer metals such as aluminum, brass or copper. Skæreolie does not drip and does not drain.

Use

- Sawing metal: just spray along the cutting edge.
- Drilling into metal: spray directly onto the position being drilled.
