Product

Characteristics

Dæk-Spray has been specially developed to feed and protect new and used tyres. Dæk-Spray is highly water repellent and protects rubber tyres against discolouring, tears and staining. Dæk-Spray renews rubbers thanks to its pure, colourless quality resin. Dæk-Spray does not contain any disruptive colour pigments, with the result that it does not leave any stains on nearby materials and surfaces. Dæk-Spray has been specially developed for vulcanised natural rubber

Applications

- Can be used in both the car and motorcycle sectors.
- Gives rubber tyres on both new showroom cars and second-hand cars an attractive appearance.
- Protects tyres against discolouring and tears.
- Protects all tyres against splashes of rain

Use

- Shake before use.
- Apply on the side of the tire.
- Allow to penetrate and wipe off the excess.
