## Packing

TT-1016 Staldrens - can 20L

TT1016

## Product

### Characteristics

Used for cleaning all types of animal pens and all areas with stringent requirements as to pen hygiene and where the water/time savings are an important factor. Highly fat solvent and is therefore extremely suitable for soaking before disinfection with BAKTOL or PAA 5. TT-96001 contains special buffers that allow the product to retain its humidification and cleaning performance, even at low concentrations.

### Applications

Used in cattle and pig pens, animal kennels, chicken sheds and widely used in mink production.

## Use

- Animal pens
  - Highly soiled: 1:50 (2%).
  - Medium soiled: 1:100 - 1:200 (1 - 0.5%).
  - Lightly soiled: 1:300 (0.3%).
- Mink
  - Kitten net/cleaning of fur stretchers: 1:50 (2%).
  -
- Apply, let work depending the degree of soiling (at least 10 minutes).
- Wipe off.
- Repeat if necessary.

Odourless and will not damage iron when used as described.
