

TT-900 Montage Tape

INTERLOCKING TAPE

- ✓ To fasten securely.
- ✓ Easy disengagement by hand.

Technical Info

- Composition: woven polyester with polypropylene interlocking mushroom stem system.
- Colour: black.
- Dimensions:
 - width: 25 mm.
 - length: 2 m.
 - thickness: 5.4 mm.
- Tensile disengagement force: 40 N/cm².
- Peel strength: 2 N/cm.
- Shear strength: 55 N/cm².
- Application temperature: from +15°C to +30°C.

Packing

TT-900 Montage Tape - 25mm

563025118

Product

Characteristics

TT-900 Montage Tape is a self-adhesive, reclosable fastener whose mushroom-shaped stems snap together to create a secure bond that can, however, be peeled apart easily due to the tape's low peel strength. The two sides of the same roll can interlock in any direction by exerting a light pressure.

Applications

- Temporary, secure attachment during transport.
- Exhibition stand assembly.
- Fastening of removable panels.

Use

Apply to a clean, dry and flat substrate. If necessary, first clean with Safety Clean and/or Multifoam. Press the tape firmly into place with a rubber roller to ensure good adhesion. It takes 24 hours at 23°C for the adhesive to reach optimum bonding strength.
