- Colour: brown.
- Odor: characteristic.
- Specific weight: 1.030 kg/l.

Packing

TT-282 Afløbsrens - can 750ml

TT282

Product

Characteristics

TT-282 is a professional, concentrated, but safe unblocker guaranteeing an immediate solution, working within 2 minutes and over 90% biodegradable – harmless for bacterial flora and fauna in the septic tank, as its action lasts 25 minutes, until it becomes inert.

Applications

- For unblocking all drains: wash basins, sinks, bath and shower, toilets, ...
- Safe for materials such as lead, metal, enamel, plastic, rubber, ...

Use

Always wear PVC or latex gloves.

- Remove any excess water from the drain.
- Very slowly pour into the blocked drain.
- Pour in a liter of cold water after 30 sec..
- Leave to work for 2-3 minutes, then drain/pour water to allow the blockage to flow away.

Use a small plastic funnel for steel, enameled ceramic drains, etc. or very small drains.
